

FEATURE · VISION-MODEL PANTRY

Snap a photo of your fridge. PantryOS inventories every item, tracks expiry, and suggests recipes prioritizing what's about to die.

HERO MOMENT

Snap → inventory reveal

STAGE DEMO

Pull fridge photo mid-pitch

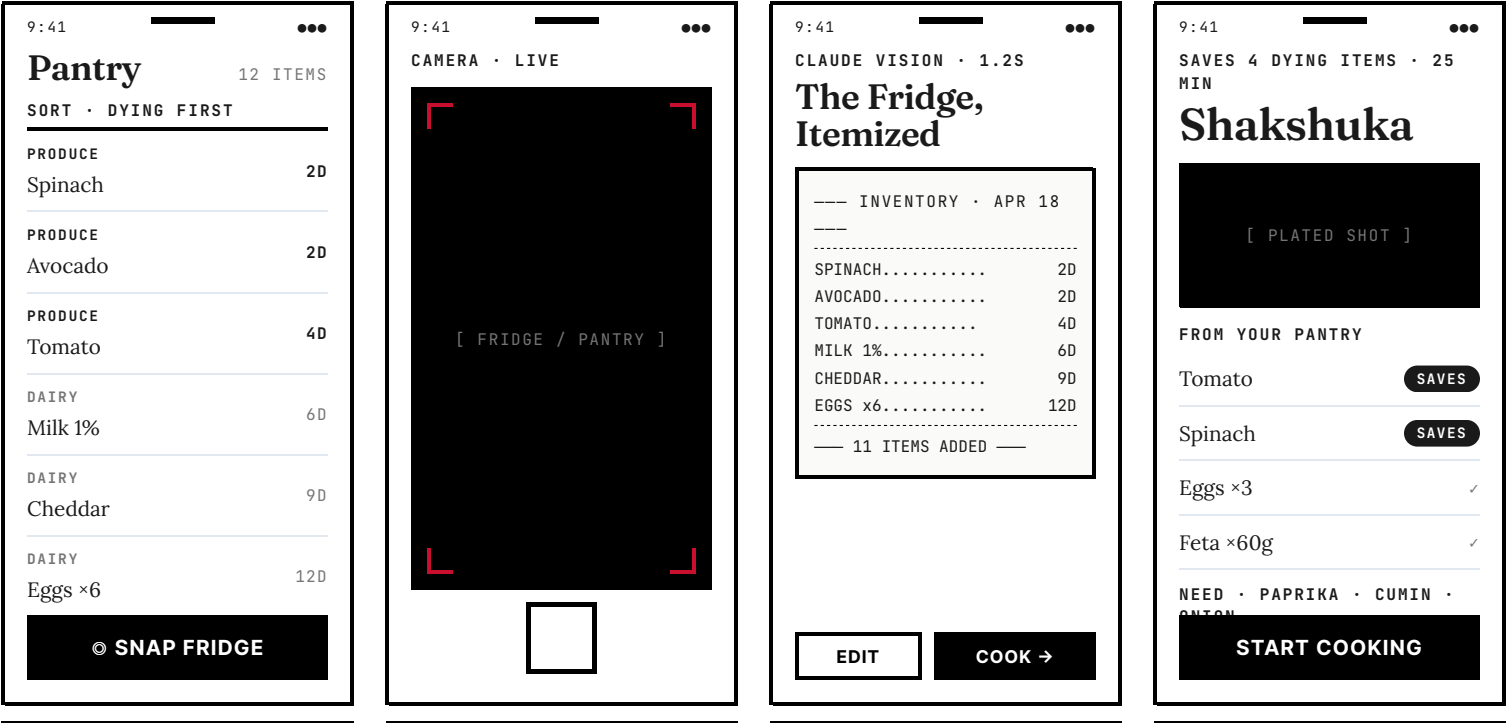

SURFACE

React, mobile web

The Pantry Receipt

camera-first, inventory unfolds like a cash-register slip

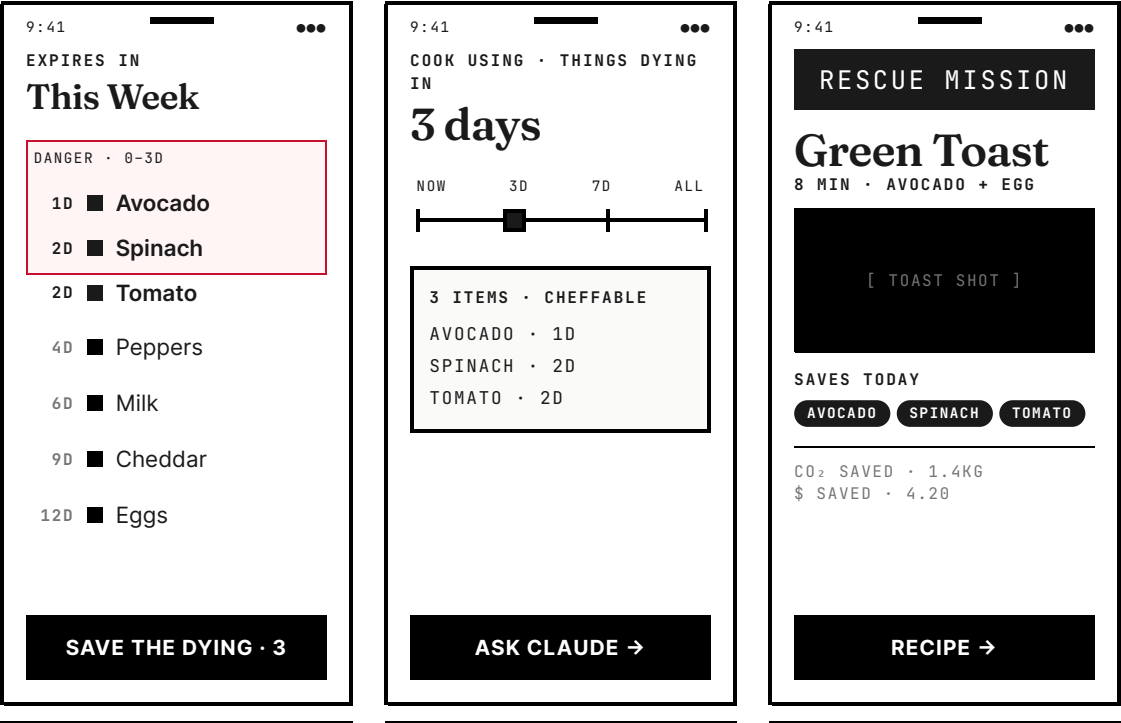

Conventional mobile pattern. Big camera button at bottom. Shot lands on a monospace receipt itemizing what Claude saw. Items sort by days-to-expiry. One tap → recipe.

The Expiry Column

a vertical timeline — today at top, safe items below

Items plotted by days-left on a single axis. Danger zone shaded at the top. A sliding rule lets you pick a threshold and ask Claude for one recipe that saves everything above the line.

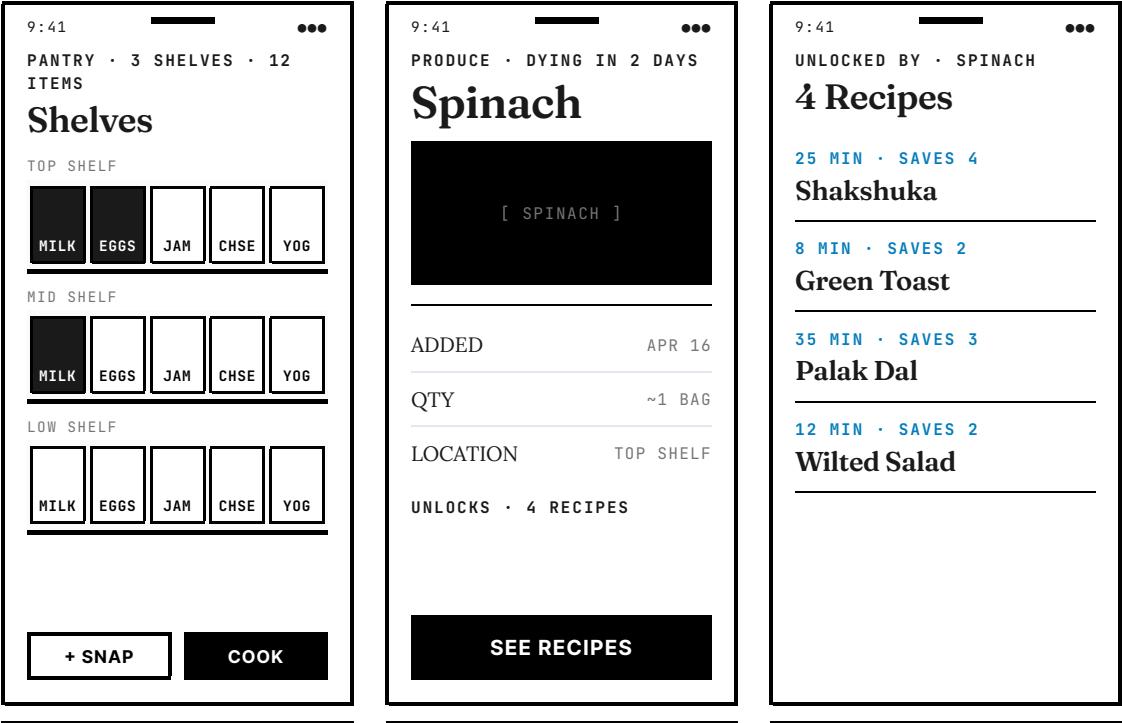

01 · COLUMN

02 · THRESHOLD

03 · RESCUE

the app IS your pantry — items drawn on literal shelves

Home renders inventory as stacked shelves. Items drawn as labeled rectangles. Dying items shift to red. Tap an item to see its expiry + recipes it unlocks.

02 · ITEM DETAIL

03 · RECIPE LIST

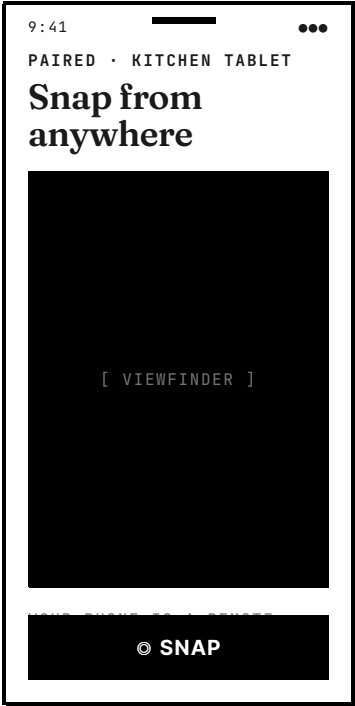

Kitchen Wall

a tablet/desktop view — pin it to the fridge

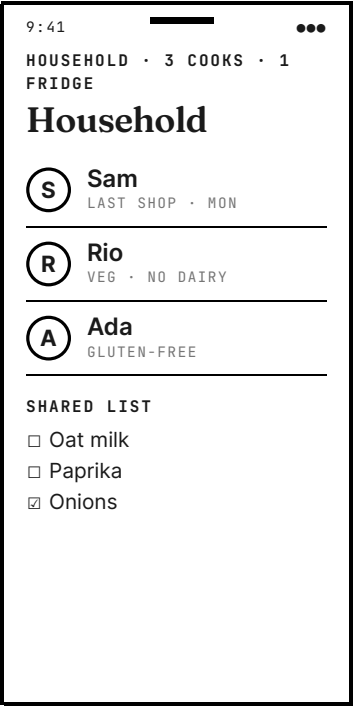

Meant for an iPad stuck to the fridge. Glanceable. Big 'cook tonight' headline, dying items listed plainly, week meal-plan grid. For households.

DESKTOP / TABLET

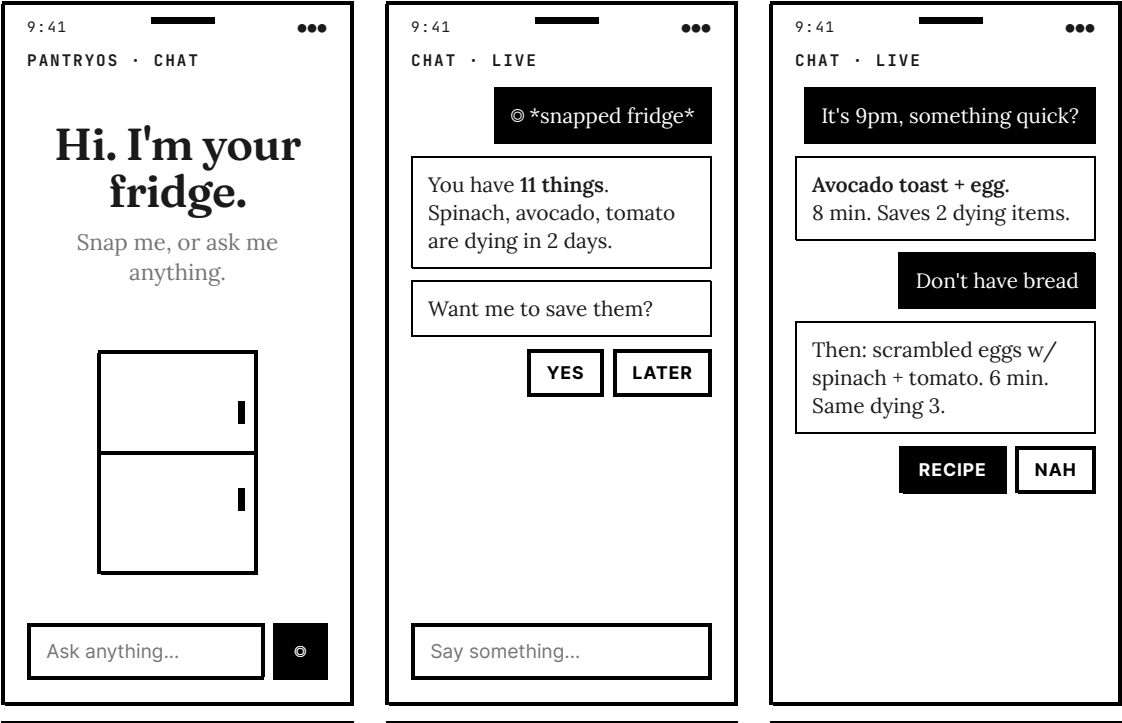

PHONE · REMOTE

HOUSEHOLD

no lists, no grids — just a chat

One screen. You talk to your fridge, it answers. Snap a photo to 'show' it something new. Demo gold — judges type & watch Claude reply in real time.

01 · EMPTY

02 · AFTER SNAP

03 · BANTER

Why this palette & type

This version re-skins PantryOS in a WIRED-derived editorial system. Paper white canvas, 2px hard black rules, square corners everywhere, one accent — newsprint red **#c8102e** — reserved exclusively for dying-item mono tags.

Type stack per the substitution note in the design system:

- **Source Serif 4** — headlines. Utilitarian serif.
- **Lora** — body. Safe BreveText substitute.
- **Inter** — buttons + UI labels. Drop-in for Apercu.
- **JetBrains Mono** — kickers, timestamps. ALL CAPS.

DEMO STRATEGY

Stage picks

For the live pitch: open on **Var 1 (Receipt)** — the receipt reveal is the cleanest "ohhhh" moment. Backup with **Var 5 (Ask the Fridge)** if judges want to interact.
